Subject index

Alcohol
induced changes, retinol binding, β-lactoglobulin 185
Alcohol oxidase
FAD-binding fold, *Hansenula polymorpha* 821
Alkaline phosphatase
bacteriophage surface expression 955
site-directed mutagenesis, *Escherichia coli* 801
Amphioxus
calcium vector protein, comparison, calmodulin, troponin C 23
Amylin
molecular modelling 539
Angiogenin
human—bovine pancreatic ribonuclease hybrid 831
Antibody–antigen complexes
molecular modelling, *Brucella abortus* O-chain polysaccharide/monoclonal antibody 427
Antifreeze polypeptide
Macrozoarces americanus, expression/characterization in *Escherichia coli* 995
Macrozoarces americanus, structure/function—role of glutamic acid 1003
AQUARIUS
solvent molecule positions, polar atoms, modelling 531
Asparagine residues
nonenzymatic deamidation, sequence/structure determinants 283
Aspartate carbamoyltransferase
structural analysis, *Escherichia coli* 391
Aspartic residues
tissue-type plasminogen activator, involvement of, fibrin/lysine binding 191
ATP binding motifs
prediction, neural network/consensus sequence comparison 615
Azurin
Met121 cassette mutagenesis, *Pseudomonas aeruginosa* 343

***Bacillus* spp.**
DNA binding protein HU, thermostability 11
Bacillus stearothermophilus
neutral protease stabilization 941
Bacillus subtilis
protease, neutral, stability, contribution of C-terminal amino acid 99
Bacteria
signal-transduction proteins/G proteins resemblance 39
Bacteriophage
surface expression—alkaline phosphatase 955
β-Barrel
structure, estimation of β-strands within 133
BPTI
folding, Pro8 451
fusion proteins expression, cleavage/affinity purification, chymotrypsin 593
Brucella abortus
antibody–antigen complexes, molecular modelling, O-chain polysaccharide/monoclonal antibody 427
Bundle motif
protein stability 849

C-terminal
amino acid, contribution of, protease, neutral, stability, *Bacillus subtilis* 99
importance for biological activity, human interferon γ 335
C5a receptor
model, interaction with ligand 767
Calbindin
structural organization 121
α-Calcitonin gene-related peptide
molecular modelling 539
Calcium vector protein
Amphioxus, comparison, calmodulin, troponin C 23
Calmodulin
comparison, *Amphioxus* calcium vector protein, troponin C 23
structural dynamics 625
Calreticulin
human, purification/characterization/expression—*Escherichia coli* 981
Carboxamide group
metal ions, interactions, proteins 49
Carboxylic group
metal ions, interactions, proteins 49
Cassette mutagenesis
Met121, *Pseudomonas aeruginosa* azurin 343
CDR-grafting
mouse mAb 425 humanization 773
Cellulase EGZ
His98/Glu133 organization, importance for catalysis, *Erwinia chrysanthemi* 325
Cellulase linker
domain, single-chain antibody containing a-, *Escherichia coli* 837
Chaperone proteins
role in protein folding, molecular mechanisms 711
Charge engineering
porcine phospholipase A_2 activity change 929
Charge models
electrostatic effects in proteins—comparison with dielectric models 903
Chymosin
functional contribution—Thr218, Lys220, Asp304 69
Chymotrypsin
cleavage/affinity purification, BPTI fusion proteins 593
Cleavage-site motifs
mitochondrial targeting peptides 33
Cobra venom
phospholipase A_2, dimeric character 171
Coiled coil
automated modelling, GCN4 dimerization region 649
Convex constraint analysis
natural deconvolution—circular dichroism curves 669
λ-Cro protein
disulphide bonding 545
Crotalus atrox
venom, phospholipase A_2 tertiary structure prediction 443
Cyclodextrin glycosyltransferase
heavy atom derivative 65
iso-1-Cytochrome *c*
yeast, invariant Phe82 residue analysis, phagemid shuttle vector 569
iso-1-Cytochrome *c* gene
Saccharomyces cerevisiae, function, effect of invariant residue Phe82 575
Cytochrome P450
human, three-dimensional structure prediction 271

Data-bank searches
protein sequence similarities, statistical tests 149
protein sequence similarity does not imply structural relationship 125
Database
enzyme reaction, similarity graphing 413
Dielectric models
electrostatic effects in proteins—comparison with charge models 903
Dipeptide composition
protein stability, prediction, primary sequence 155
Diphtheria toxin
receptor-binding domain—substitution by interleukin 6 989
related interleukin 2 fusion toxins increase cytotoxicity, protein engineering 463
DNA binding domain
GCN4 protein, yeast transcriptional activator 3
DNA binding protein
HU, thermostability, *Bacillus* spp. 11
DNA binding site
role of tyrosine residues, Pf1 gene 5 protein 553

Elastase
binding loop, interleukin 1β 313
Endothelin
structure, ^{1}H-NMR spectroscopy, distance geometry 509
Enzyme binding interactions
linear free energy relationships 229

Enzyme II
characterization, phosphoenolpyruvate-dependent phosphotransferase system, *Staphylococcus* 475
Enzyme III^{lac}
characterization, phosphoenolpyruvate-dependent phosphotransferase system, *Staphylococcus* 469
Enzymes
engineering of supramacromolecular complexes using reversed micelles 1009
Erwinia chrysanthemi
cellulase EGZ, His98/Glu133 organization, importance for catalysis 325
Escherichia coli
alkaline phosphatase, site-directed mutagenesis 801
aspartate carbamoyltransferase, structural analysis 391
horse heart myoglobin synthetic gene expression 585
human calreticulin expression/purification/characterization 981
human folate-dependent trifunctional enzyme 493
immunoglobulin protein engineering, expression 947
Macrozoarces americanus antifreeze polypeptide expression/characterization in 995
McPC603 antibody F_{ab} fragment secretion/folding 971
phage lambda lysozyme overexpression 485
rabbit muscle glycogen phosphorylase, production in 351
single-chain antibody containing a cellulase linker domain 837
sugar-inducible expression vectors—new family 843
Expression vectors
sugar-inducible, new family, *Escherichia coli* 843

Factor IX
human, propeptide, protein engineering 319
FAD
-binding fold, *Hansenula polymorpha* alcohol oxidase 821
Fibrin
binding, involvement of tissue-type plasminogen activator aspartic residues/glutamic residues 191
Firefly
luciferase mutants isolation/characterization 691
Folate
-dependent human trifunctional enzyme, *Escherichia coli* 493
Four-helix bundle proteins
electrostatic interactions, loops, α-helices 225
Free energy calculations
ribonuclease T1 mutants, molecular dynamics/free energy perturbation 233
Free energy relationships
linear, enzyme binding interactions 229
Fremyella diplosiphon
phycocyanin hexamer stability—role of electrostatic interaction 681

G proteins
signal-transduction proteins, resemblance, bacteria 39
β-Galactosidase
protein modificaton, N-terminal peptide fragment 205
GCN4
dimerization region, coiled coil automated modelling 649
GCN4 protein
yeast transcriptional activator, DNA binding domain 3
Genetic engineering
exogenous peptide epitope expression, immunoglobulin 215
Glutamic acid
role of—*Macrozoarces americanus* antifreeze polypeptide structure/function 1003
Glutamic residues
tissue-type plasminogen activator, involvement of, fibrin/lysine binding 191
Glutamine residues
nonenzymatic deamidation, sequence/structure determinants 283
Glycogen phosphorylase
rabbit muscle, production in *Escherichia coli* 351

α-α-Hairpins
short connections, structure 245
Hansenula polymorpha
alcohol oxidase, FAD-binding fold 821
Heat-shock proteins
role in protein folding, molecular mechanisms 711
α-Helix
folding, Monte Carlo simulated annealing, ribonuclease A C-peptide 639
His-X_3-His sites characterization, synthetic metal-binding bovine somatotropin 301
loops, electrostatic interactions, four-helix bundle proteins 225
Hirudin
recombinant, human thrombin inhibition 295
Histidine residues
metal ions, interaction, proteins 57
HIV
protease inhibitors, shape 1
Homology modelling
subtilases (subtilisin-like serine proteinases) 719
HU
DNA binding protein, thermostability, *Bacillus* spp. 11
Hydrogen bonding
proteins, graphical representation 421

IgG
binding protein—synthesis/mutagenesis, *Staphylococcus aureus* 963
Immune system
polypeptides, molecular diversity creation 371
Immunoglobulin
exogenous peptide epitope expression 215
protein engineering, expression, *Escherichia coli* 947
Inhibitor azide
complex, *Pseudomonas ovalis* iron superoxide dismutase 113
Insulin
human, semisynthesis, trypsin catalysis 409
Integrase
retrovirus, leucine zipper motif identification 435
Interferon γ
human, C-terminal, importance for biological activity 335
Interleukin 1β
elastase-binding loop 313
Interleukin 2
fusion toxins, diphtheria toxin-related, protein engineering, increase cytotoxicity 463
Interleukin 6
substitution by, diphtheria toxin receptor-binding domain 989
Interleukin 8
modelling MCAF/MCP-1 structure from 263
IPTG
heterologous protein inducer, synthesis 1019
Iron superoxide dismutase
Pseudomonas ovalis, complex, inhibitor azide 113

β-Lactamase
new, site-directed mutagenesis 79
Streptomyces albus, catalysis—role of arginine 220, site-directed mutagenesis 811
Lactococcus lactis
serine proteinase protein engineering 479
β-Lactoglobulin
alcohol-induced changes, retinol binding 185
Leucine zipper motif peptide
structure 519
Loops
elastase-binding, interleukin 1β 313
α-helices, electrostatic interactions, four-helix bundle proteins 225
Luciferase
mutants isolation/characterization, firefly 691
Lysine
binding, involvement of tissue-type plasminogen activator aspartic residues/glutamic residues 191
Lysine-retinal chromophores
geometry, energy parameters 885
Lysozyme
phage lambda, overexpression, *Escherichia coli* 485

mAb 425
mouse, humanization, CDR-grafting 773
Macromolecules
topological equivalences 877
Macrozoarces americanus
antifreeze polypeptide, expression/characterization in *Escherichia coli* 995
antifreeze polypeptide structure/function—role of glutamic acid 1003

MCAF/MCP-1
structure, modelling from interleukin 8 structure 263
McPC603 antibody
F_{ab} fragment secretion/folding, *Escherichia coli* 971
Membrane proteins
sequence, structure 109
Metal ions
carboxylic group/carboxamide group, interactions, proteins 49
histidine residues, interaction, proteins 57
Mitochondrial targeting peptides
cleavage-site motifs 33
Molecular docking
distance-constrained, simulated annealing 177
Molecular dynamics simulations
trp-aporepressor 871
electrostatic screening 911
Monte Carlo simulated annealing
α-helix folding, ribonuclease A C-peptide 639
Myb oncoprotein
DNA binding domain, proposed structure 891
Myoglobin
horse heart, synthetic gene expression, *Escherichia coli* 585

Neutral protease
stabilization, *Bacillus stearothermophilus* 941

O-chain polysaccharide
monoclonal antibody, antibody–antigen complexes, molecular modelling, *Brucella abortus* 427
Octarellin
de novo protein, structure, spectroscopic study 745
Ornithine transcarbamylase
site-directed mutagenesis, Arg60, Cys271, rat liver 73
Oxidoreductase
genes, subcloning, hyperexpressing, protein engineering 701

Pancreatic ribonuclease
bovine—human angiogenin hybrid 831
Papain
function, role of Ser176, site-directed mutagenesis 307
PCR
new method using biotinylated universal primers/streptavidin-coated magnetic beads 601
Peptide bond hydrolysis
mechanism, role of electrostatic interactions 919
Peptide receptor binding
modelling, new method 251
Pf1 gene 5 protein
DNA-binding site, role of tyrosine residues 553
Phage lambda
lysozyme overexpression, *Escherichia coli* 485
Phosphoenolpyruvate
dependent phosphotransferase system, enzyme II characterization, *Staphylococcus* 475
dependent phosphotransferase system, enzyme III^{lac} characterization, *Staphylococcus* 469
3-Phosphoglycerate kinase
yeast, arginine 65 site-directed mutagenesis, catalytic activity 935
Phospholipase A_2
Asp99/Tyr52/Tyr53 function 199
Crotalus atrox venom, tertiary structure prediction 443
dimeric character, cobra venom 171
molecular dynamics simulations 163
porcine, activity change, charge engineering 929
Phosphotransferase system
phosphoenolpyruvate-dependent, enzyme II characterization, *Staphylococcus* 475
phosphoenolpyruvate-dependent, enzyme III^{lac} characterization, *Staphylococcus* 469
Phycocyanin
hexamer stability—role of electrostatic interaction, *Fremyella diplosiphon* 681
Plasminogen activator
urokinase-type, activity, effects of mutations 923
Polypeptides
molecular diversity creation, immune system 371
Prediction
improvement, secondary structure, TIM-barrel enzymes 359
Propeptide
human factor IX, protein engineering 319
Protease
inhibitors, HIV, shape 1
Protease, neutral
stability, contribution of C-terminal amino acid, *Bacillus subtilis* 99
Protein engineering
human factor IX propeptide 319
oxidoreductase genes 701
recombinant, chemical 709
subtilases (subtilisin-like serine proteinases) 719
Protein sequence
comparison, methods 375
Protein sequence alignment
simultaneous, multivariate, SCR/physiochemical profiles correspondence 603
Protein sequence similarities
data-bank searches, statistical tests 149
Protein sequence similarity
does not imply structural relationship, data-bank searches 125
Protein structure
analysis—function relationships, query system 221
study of, simulated annealing 661
Protein topology
prediction, constraint-based search, topological folding rules 751
Protein/nucleic acid interaction
ribonuclease T1, tyrosine 45→tryptophan mutant, hydrophobic effects on 793
Pseudomonas aeruginosa
azurin, Met121 cassette mutagenesis 343
Pseudomonas ovalis
iron superoxide dismutase, complex, inhibitor azide 113

Retinol
binding, β-lactoglobulin, alcohol-induced changes 185
Retroviral nucleocapsid protein
processing of by viral proteinase 695
Retrovirus
integrase, leucine zipper motif identification 435
Ribonuclease A
C-peptide, α-helix folding—Monte Carlo simulated annealing 639
Ribonuclease T1
mutants, free energy calculations, molecular dynamics/free energy perturbation 233
tyrosine 45→tryptophan mutant, hydrophobic effects on protein/nucleic acid interaction 793

Saccharomyces cerevisiae
iso-1-cytochrome *c* gene function, effect of invariant residue Phe82 575
Salt bridges
engineered, effects of, subtilisin BPN′ stability 87
Sequence conservation
transmembrane regions, inter-species 45
Serine proteinase
Lactococcus lactis, protein engineering 479
Serine proteinases
subtilisin-like, homology modelling/protein engineering 719
Serpins
structures, models 107
Signal-transduction proteins
G proteins, resemblance, bacteria 39
Simulated annealing
distance-constrained molecular docking 177
study of protein structure 661
Single-chain antibody
containing a cellulase linker domain, *Escherichia coli* 837
Site-directed mutagenesis
chymosin, Thr218, Lys220, Asp304 69
Escherichia coli alkaline phosphatase 801
new β-lactamase 79
ornithine transcarbamylase, Arg60, Cys271, rat liver 73
papain function, role of Ser176 307
role of arginine 220—*Streptomyces albus* β-lactamase1 catalysis 811

TEM-1 β-lactamase 805
yeast 3-phosphoglycerate kinase arginine 65, catalytic activity 935
Somatotropin
metal-binding, bovine, synthetic, His-X_3-His sites characterization 301
Staphylococcus
phosphoenolpyruvate-dependent phosphotransferase system, enzyme II characterization 475
phosphoenolpyruvate-dependent phosphotransferase system, enzyme III^{lac} characterization 469
Staphylococcus aureus
IgG binding protein synthesis/mutagenesis 963
Statistical tests
data-bank searches, protein sequence similarities 149
β-Strands
estimation of, within β-barrel structure 133
Streptomyces albus
β-lactamase, catalysis—role of arginine 220, site-directed mutagenesis 811
***Streptomyces* subtilisin inhibitor**
subtilisin BPN′ active site molecular recognition 501
Subtilases
subtilisin-like serine proteinases, homology modelling/protein engineering 719
Subtilisin BPN′
active site molecular recognition using *Streptomyces* subtilisin inhibitor 501
stability, effects of engineered salt bridges 87
Supramacromolecular complexes
enzymes, engineering of using reversed micelles 1009
T7 DNA polymerase
use of, site-specific forced misincorporation mutagenesis 579

TEM-1 β-lactamase
site-directed mutagenesis 805
Tertiary fold prediction
using motif constraints/distance 853
Thrombin
human, inhibition, recombinant hirudin 295
TIM-barrel
enzymes, secondary structure prediction, improvement 359
Tissue-type plasminogen activator
aspartic residues, glutamic residues, involvement of, fibrin/lysine binding 191
TNF-α
analog, solution structure, conformational dynamics 739
TNF-β
receptor binding, necessity of aspartic acid 50/tyrosine 108 785
Transcriptional factor
yeast, quaternary structure, leucine zipper, yeast 457
Trifunctional enzyme
human folate-dependent-, *Escherichia coli* 493
Tropomyosin
human, conformational stability 561
Troponin C
comparison, *Amphioxus* calcium vector protein, calmodulin 23
structural dynamics 625
***trp*-aporepressor**
molecular dynamics simulation 871
Trypsin
catalysis, human insulin semisynthesis 409
Tumour necrosis factors
human, structure, function 385

Valine
conformational equilibrium, studied by dynamics simulation 761
Viral proteinase
retroviral nucleocapsid protein processing by 695

Yeast
iso-1-cytochrome *c* invariant Phe82 residue analysis, phagemid shuttle vector 569
3-phosphoglycerate kinase, arginine 65 site-directed mutagenesis, catalytic activity 935
transcriptional activator, GCN4 protein, DNA binding domain 3
